House for an
antimatter
physicist

Milan, IT

Apartment

90sqm

When your client is a genius!, you may be asked: how can we change the idea of an unhappy past, avoiding the tabula rasa?

how can we make everything fit? a real kitchen, a room for conversation with a hearth, a reading room, a study with a map of the world, an alcove with a private bathroom, a two-seat Jacuzzi?

Could we also add a bunk bed for the children (with dedicated bathroom of course) and a genkan where to leave the shoes and walk barefoot?
