Attilio

Attilio

Coffee Table

Attilio is a table with a simple and kaleidoscopic design. Its top, round and thin, reveals the nature of the material it is made of. The thousand legs, those same design elements that give shape to Milietta and Angiolina, provide it with ground.

This table wants to celebrate the freshness of metal in its simplest forms of production: rolling and profiling. And it knows how to be materially explicit in its tropicalized version, where the reflections of zinc and chrome leave its pure form to the gaze.

In its oven-painted version Attilio instead celebrates the joy of colour: the cylindrical legs alternate full colors in binary contrasts that light up the house with “joie de vivre”.

Attilio is a coffee table in 3 different proportions.
